

Telehealth and COVID-19

Implications for HIV Care & Treatment

TeleHealthHIV Launches

CAPACITY BUILDING

WEBINARS

RESOURCES

[HealthHIV.org/TeleHealthHIV](https://www.healthhiv.org/telehealthhiv)

TeleHealthHIV CBA Content Areas

- Organizational assessment of capacity and readiness for telehealth
- Funding a telehealth program for long-term sustainability
- Reimbursement opportunities and payment barriers
- Hardware, software and opportunities for community partnerships
- Telehealth models that work best with the agency (direct-to-consumer vs. presenting site)
- Workflows, policies and procedures for new or existing telehealth programs
- Internal trainings for staff to adopt telehealth workflows and systems
- Client education materials tailored to the telehealth services

Introductions - HealthHIV

Michael Shankle

Senior Director of Capacity Building

Anna Clayton

Capacity Building Manager

Introductions - Speakers

Michael Murphree
Chief Executive Officer
Medical Advocacy and Outreach
Montgomery, AL

Reetu Grewal, MD
Medical Director
UF Health Family Medicine & Pediatrics
Baymeadows
Jacksonville, FL

Learning Objectives

By the end of this webinar, participants will be able to:

- Identify changes to telehealth policy and reimbursement as responses to COVID-19
- Identify applications of telehealth to HIV care and treatment
- Describe options for implementing telehealth for HIV care during the COVID-19 pandemic and beyond

Submit questions through the Q&A chat box. Questions will be facilitated at the end of the webinar.

Telehealth - A Brief Review

A modality for delivering health care services and public health via information and communication technologies

Applications

- Diagnosis
- Consultation
- Treatment
- Education
- Care management
- Self-management

Benefits

- Access to HIV prevention and care services
- Client engagement
- Patient/provider relationship

Telehealth & COVID-19

Policy Developments & Expansion

Telehealth & COVID-19: Medicare

Former Medicare Policy for Telehealth

- Rural areas
- Specified medical locations
- Virtual check-ins/e-visits
- Specific services

COVID-19 Response

- More healthcare services
- More locations (including client's home)
- Reimbursement parity
- Option to reduce/waive cost-sharing

Purpose: keep clients at home; save space in healthcare settings; prevent exposures

Telehealth & COVID-19: HIPAA

Former HIPAA Policy for Telehealth

- Covered entities must follow HIPAA standards to protect protected health information through telehealth
- Business Associate Agreements with third parties
- HIPAA-compliant platforms

COVID-19 Response

- *Notification of Enforcement Discretion* for health care providers
- Removes penalties for HIPAA violations
- Applies to all telehealth services
- BAAs not required for communications services

Presented By Michael Murphree, CEO

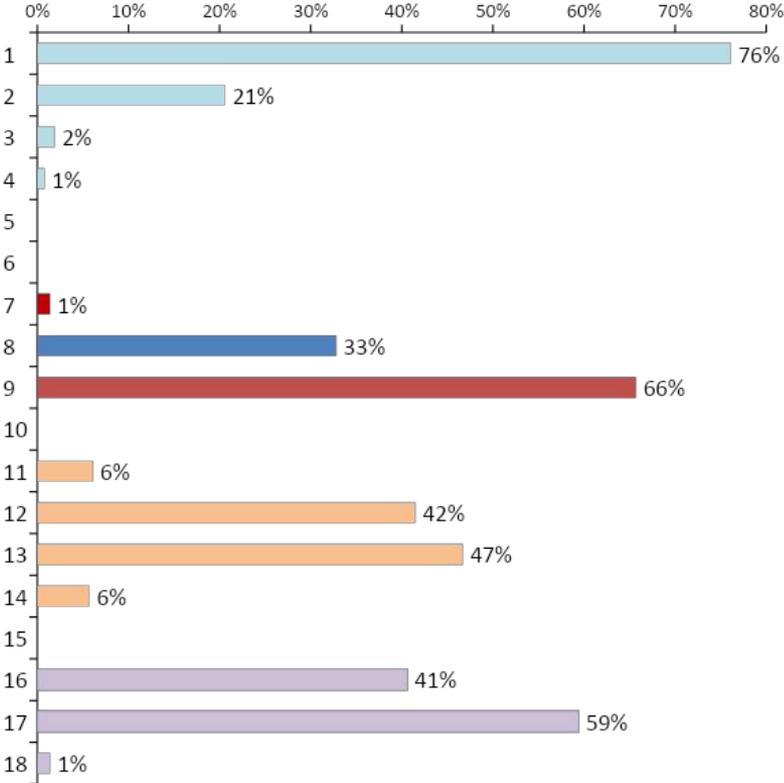

Summary of MAO

- A nonprofit, 501(c)3 organization originally established in 1987 that has expanded from a small, volunteer-based agency to a large full-service organization comprised of 115 employees
- Ryan White Part C grantee, Part B provider and Part D provider
- MAO promotes HIV knowledge and care to a growing client population, along with educational resources to the communities in which these clients live

Poverty Rates in Alabama

Out of Alabama's 67 counties:

- 46 counties have poverty rates that are higher than the national average
- 23 counties have poverty rates above 20%
- 5 counties have poverty rates above 30%
- Wilcox County has the highest poverty rate in Alabama, with 38.5% of its population living below the poverty line.
- According to the US Census Bureau, the **average household income in Alabama** is less than 200% of the federal poverty definition.
- Fully 17.1% (or roughly 1 out of every 6 of Alabama's 4.8M residents) **live below the federal poverty line**

Health Professional Shortage Areas 2015

- 62 of Alabama's 67 counties are, either partially or whole, Health Professional Shortage Areas.

Barriers for Rural Care Models

- Hospital closings in rural communities
- Buy in from state and local leaders for healthcare equity
- Higher rates of uninsured people in rural communities
- Rural culture and stigma in communities toward healthcare
- Technological issues for rural medical and behavioral health providers including broadband limits

MAO

Alabama Health

- In the original Alabama e-Health project, MAO partnered with Thrive Alabama in Huntsville and Whatley Health Services, Inc in Tuscaloosa to bring telemedicine services to 50 of Alabama's 67 counties.
- An innovative strategy, telemedicine links rural satellite HIV specific primary care medical clinics to providers in their permanent clinics and delivers improved access through expanded reach by providers and health facilities to patients in rural and distant locations.

What is telemedicine at MAO?

- Telemedicine is a video chat environment between a doctor and a patient
- High definition camera and video screen with 1080p capability
- Bluetooth peripheral equipment
- Maximum security: telemedicine uses 256 bit encryption – Matches the level of encryption used by the DOD

Early Screens

MAO

Telemedicine/Telehealth Currently

Telemedicine/Telehealth Currently

MAO Telemedicine/Telehealth Services

- Medical care (initial visit done in person)
- Individual psychotherapy and addictions counseling
- Pharmacologic management
- Social Work services
- Individual medication nutrition therapy
- Follow-up inpatient telehealth consultations

Telemedicine Demographics 2019

Telemedicine vs Clinic Statistics 2019			
	Total	Clinic	Telehealth
Patient Count	2038	1776	262
Viral Load Suppression	88.60%	88.40%	90.20%
Retention Rate	80.80%	80.30%	80.50%

Results of our Work

As of May 31, 2019, MAO had conducted more than 4,835 telehealth contacts. We had approximately 912 patients/clients who received some part of their care through our telehealth network

- >90% of our patients reported being extremely satisfied in the care received through telehealth
- 93% virologic suppression rate of HIV in those patients that are HIV positive and receive care through telehealth
- 89% retention in care rate of our telehealth patients

Results of our Work

Based on zip code data of where patients traveled to for care as opposed to the hub site of MAO provider:

- 662,568 miles of driving saved by our patients over a 5 year period
- \$361,099.56 saved in driving expenses (at prevailing GSA mileage reimbursement rate)
- 148.56 miles saved on average per encounter
- 781.33 miles saved on average per patient over 5 years
- 11042.8 hours of total drive time saved for patients traveling to satellite telehealth clinics rather than our Hub sites in Montgomery or Dothan

Financial Considerations

- Hardware Codecs
 - Starting price of \$4500 with 1 year maintenance
 - Full cart-based system approximately \$8500
 - Convene Units at \$3800
 - Peripheral costs in addition as needed
- Software Codecs available for use with computer
 - Costs vary depending on product (\$200 -\$300 monthly)
 - Make sure HIPAA compliant
- Third party payers are supporting in greater numbers

COVID-19 IMPACT and Telemedicine/Telehealth

- Medical providers able to serve from home.
- Behavioral therapists and social workers assisting from home offices
- Mail-order medication delivery utilized more with telehealth consults
- Making “Suitcase Units” more of a reality after current pandemic

GREETINGS

from

76548₁₃

Florida

TM Background

- TM Program started in 2017
 - Neurology & Family Medicine
- September 2017 awarded CDC funds to tailor existing TM program to PLWH
- Goal >200 unique PLWH via TM

TM Background

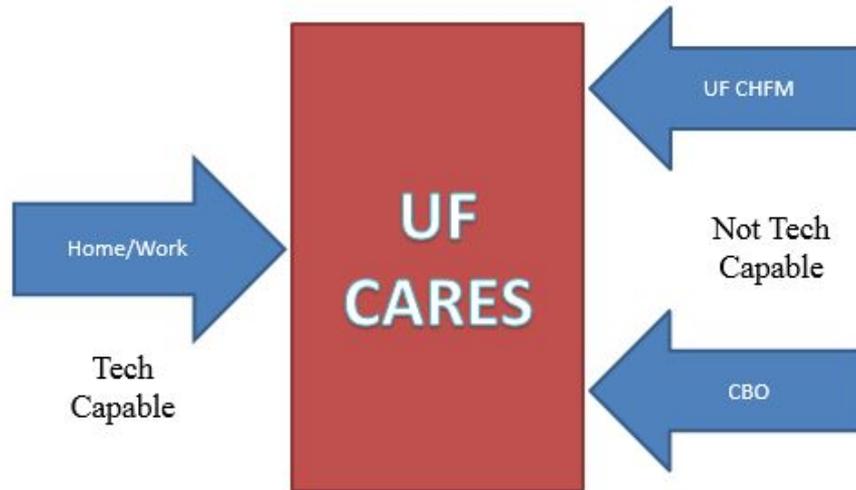

- Project went live in September 2018
- EMR is EPIC
- MyUFHealth portal
- Previously using Vidyo Platform
- February 2020 updated to Zoom

Clinical Eligibility Criteria

- Symptoms that would NOT be appropriate for a Telemedicine Visit:
 - Any acute/life-threatening illness
- Medical complications or conditions NOT appropriate for Telemedicine Visit:
 - CD4 count < 200 cells/mm³
 - Unstable chronic disease
 - Chronic pain – requiring narcotics be prescribed during the Virtual Visit

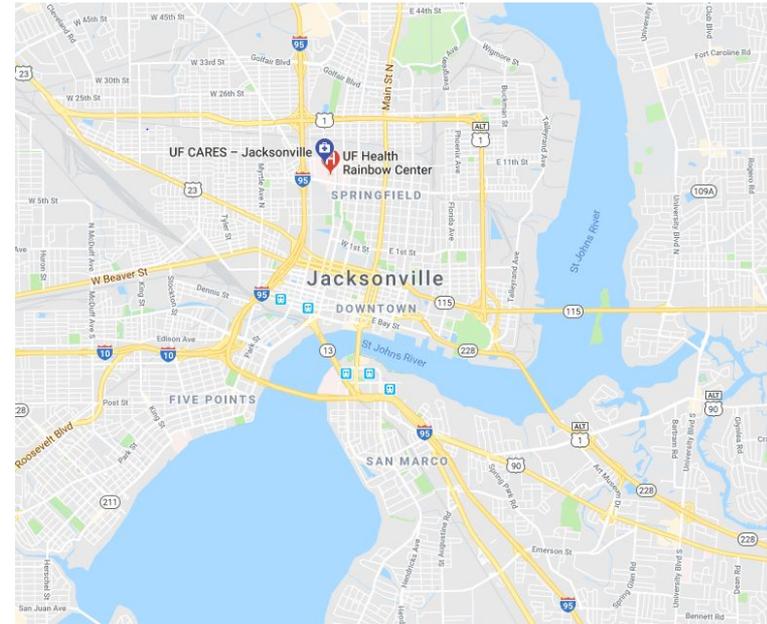

Eligibility Criteria

Where Will Care Be Accessed?

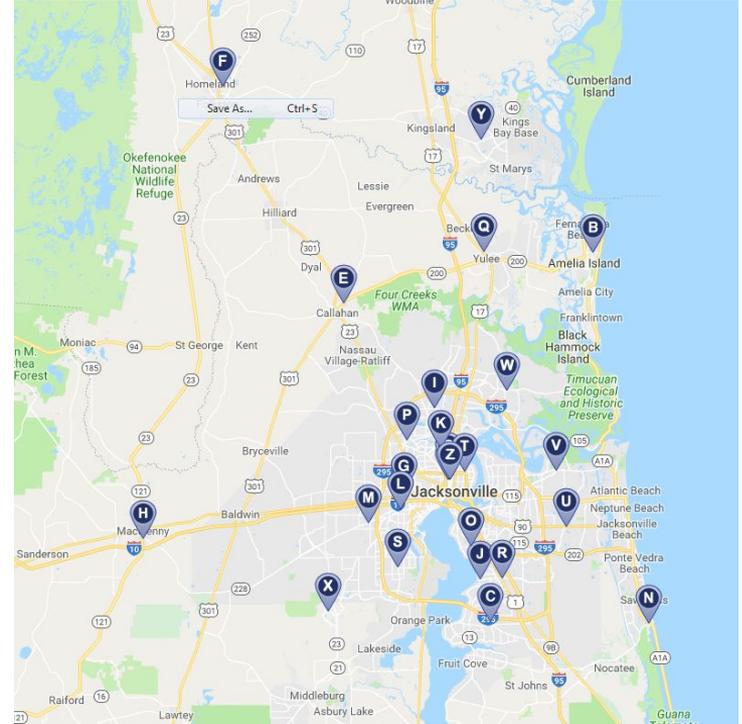

Services

- Pediatric care
- Chronic disease treatment: HIV, Hep B/C
- Gynecology
- Social work/Case management
- Psychology
- Pharmacy
- Nutrition

Partners

- 31/31 UF CHFM sites trained as presenting sites
- CBO partners:
 - JASMYN
 - River Region
 - NFAN
 - Edgewood Pharmacy
 - Nassau County HD

Project Challenges

- Reimbursement for TM
 - Florida has no parity laws for TM
 - FL Medicaid approved TM 12/18
 - Local TGA for Ryan White approved TM in 3/19
 - Other insurances variable

Project Challenges

- Lack of dedicated staff
- Patient engagement
- Provider engagement
- Technical issues with Vidyo on patient side

Project Successes

- Weekly case conferences
 - Interdisciplinary team review of upcoming appointments
 - Screening for TM appropriateness
- Hiring of TM Navigator 12/19

Project Successes

The screenshot displays a medical software interface with a 'Rooming' tab selected. The interface includes a navigation bar with tabs for 'Reason for Visit', 'Travel Screening', 'Consult Orders', 'Vital Signs', 'OB/Gyn Status', 'Allergies', 'Problem List', 'Verify Rx Benefits', 'Outside Meds', 'Medication Review', 'Questionnaires', and 'Hearing/Vision'. Below this, there are sub-tabs for 'History', 'SDOH', 'Result Console', 'BestPractice', and 'HEDIS'. The 'BestPractice' sub-tab is active, showing a list of test results organized into categories: COLON GUARD, URINE, ENDOCRINE, HEMATOLOGY, and COAGULATION. At the bottom, a yellow banner titled 'BestPractice Advisories' contains a 'Care Guidance (1)' section with a warning icon and text about UF CARES TELEMEDICINE CHFM. Below this, a list of criteria for a virtual visit is provided.

Rooming

Reason for Visit | Travel Screening | **Consult Orders** | Vital Signs | OB/Gyn Status | Allergies | Problem List | Verify Rx Benefits | Outside Meds | Medication Review | Questionnaires | Hearing/Vision

History | SDOH | Result Console | **BestPractice** | HEDIS

Cologuard	PSA
URINE	Uric Acid
Microalbumin, Urine Random	Hepatitis C Antibody
Urine Protein	HEMATOLOGY
ENDOCRINE	Hct
Hgb A1C	COAGULATION
TSH	PT
PTH	INR

Prior to COVID-19

- As of 8/26/19:
 - 71 TM visits conducted
 - 58 unique patients
- As of 2/10/20:
 - 178 TM visits conducted
 - 115 unique patients

Prior to COVID-19

- As of 2/10/20:

Ancillary Services:

- Psychology (3 visits, 2 unique patients)

CBO Partners

- Nassau County only

Changes Since COVID-19

- UF CARES is a Hospital Based Clinic
- UF Health has consolidated entrances for patients and staff

Changes Since COVID-19

- Eligibility Criteria loosened
- All patients eligible regardless of CD4 count
- All patients are converted to TM visit or rescheduled for summer
- Emergency care only in clinic

Updates Since COVID-19

- Increase in utilization of TM from community partners
- Reimbursement for TM from most insurance plans
- Connection issues mostly resolved with Zoom

Updates Since COVID-19

- As of 3/30/20:
 - TM visits conducted 257
 - Unique patients 168
- Ancillary Services:
 - Psychology (10 visits, 9 unique patients)
 - Pharmacy
 - Nutrition

thank you!
